SHI CORPORATION

TPS delivers design management and structured cabling solutions

SHI International Corporation purchased its first UK warehouse close to motorway links in Barnsley. Two empty units required merging into onepurpose built operational facility.

SHI being a global leader in technology and innovation tasked it's project implementation team to find an infrastructure specialist. Following recommendations from a business contact within the industry, the company approached TPS to provide designs for a full infrastructure fit-out to the space.

ABOUT THE COMPANY

SHI Corporation UK Ltd connects teams with the IT solutions and services needed to support organisational growth, security and employee experience. Scalable and cost-effective, the company's technology solutions embrace digital evolution, providing everything needed to fulfil each company's IT vision.

03

04

CHALLENGE

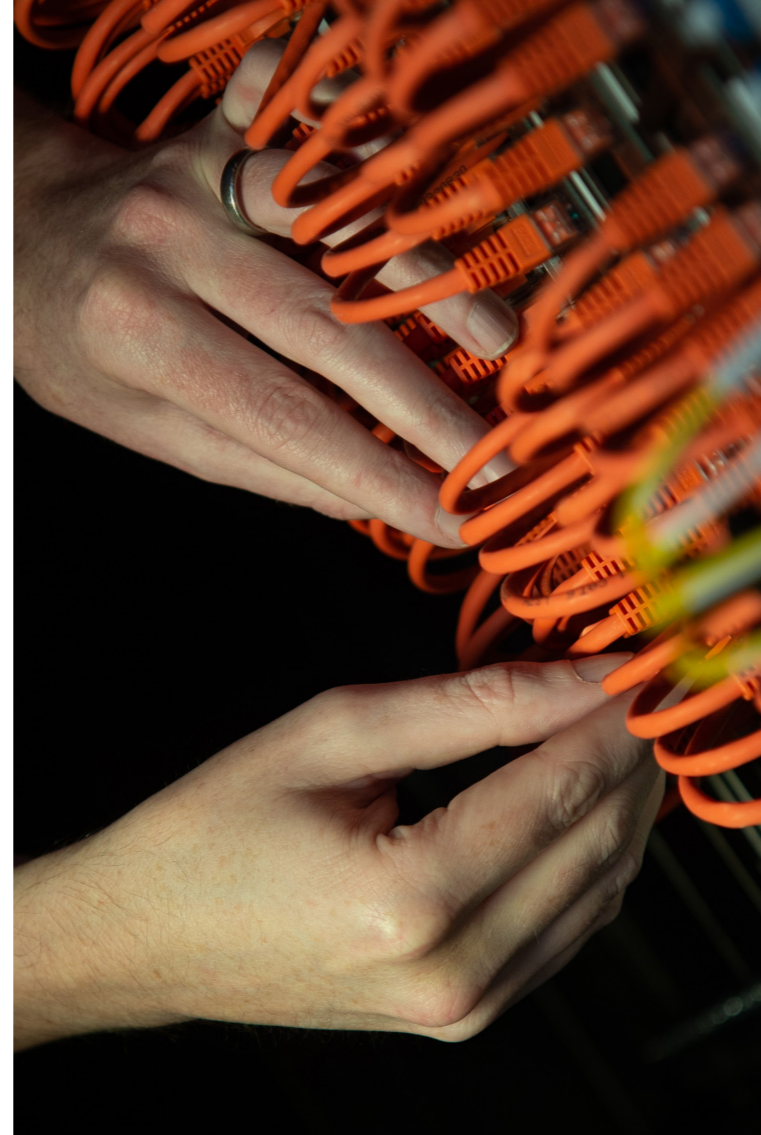

The challenge was to provide a complete infrastructure fit-out to the empty building to prepare it for use as a functional warehouse space. The warehouse would then be used to house specialist data centre technology prior to then testing, commissioning and shipping it to prospective clients. The space needed to be fully functional as swiftly as possible to support internal time specifications.

SOLUTION

TPS were commissioned to install a structured cabling system; which included a mixture of high level cabling, office cabling and warehouse cabling using CAT 6 and CAT 6A cables to support a total of 492 connections. The company also supplied and installed 44 data cabinets for use within the Integration Build Room, Customer Experience Room and Cold Room. All works were completed, tested and commissioned within 12 weeks by the TPS team of in-house engineers and project managers.

05

/ TESTIMONIAL

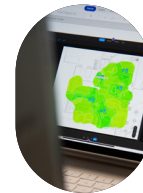

“

Despite TPS picking up the project quite late in the process, and the subsequent time constraints placed upon them, the whole project was carried out within the 12 week timeframe and to specification.
